PROFESSIONAL SUMMARY

Computer Science graduate from Tshwane University of Technology, with all academic requirements completed and currently awaiting graduation. Strong foundation in software development, full-stack web development, database management, object-oriented programming, REST API development, authentication, and system design.

Hands-on experience through academic and personal projects using Java, JavaScript, TypeScript, Next.js, React, Node.js, Express.js, SQL, MySQL, PostgreSQL, PL/SQL, Git, and GitHub. Familiar with modern development and deployment tools including Tailwind CSS, Figma, Postman, Neon DB, Vercel, and Render. Strong problem-solving, teamwork, debugging, and continuous learning skills, with an interest in building practical software solutions.

CORE COMPETENCIES

- Software Development
- Full-Stack Web Development
- Frontend Development
- Backend Development
- Database Design and Management
- Object-Oriented Programming
- REST API Development
- CRUD Operations
- Authentication and Authorization
- Role-Based Access Control
- SQL and Database Management
- Responsive Web Design
- UI/UX Design
- Git and Version Control
- Debugging and Troubleshooting
- Agile Development
- System Design
- Technical Documentation
- Problem-Solving
- Team Collaboration

WORK EXPERIENCE

Software Developer / Full-Stack Developer – Work-Integrated Learning (WIL)

4IR Research Lab | 2026 – Present

- Develop and maintain full-stack web applications using modern frontend and backend technologies.
- Build responsive user interfaces using Next.js, React, TypeScript, Tailwind CSS, and JavaScript.
- Develop backend functionality and REST APIs using Node.js and Express.js.
- Design and manage relational databases using PostgreSQL, SQL, and Neon DB.
- Implement CRUD operations, authentication, authorization, and role-based access control.
- Use Git and GitHub for version control and collaborative software development.
- Test and debug applications using development and API testing tools such as Postman.
- Deploy and manage applications using Vercel and Render.
- Participate in software development activities including system design, problem-solving, debugging, documentation, and testing.
- Collaborate with other team members to develop and improve software solutions.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, PL/SQL, Python, HTML, CSS

Frontend: Next.js, React, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs, JWT, bcrypt

Databases: MySQL, PostgreSQL, SQL, Neon DB

Tools: VS Code, Eclipse, Git, GitHub, GitHub Desktop, Postman, Figma

Deployment: Vercel, Render, AWS Fundamentals

Other: Microsoft Word, Excel, PowerPoint

PROJECTS

Public Clinic Queue & Stock Tracker

Technologies: Next.js, TypeScript, Tailwind CSS, Node.js, Express.js, PostgreSQL, Neon DB, Git, GitHub, Vercel, Render,
Figma

- Developed a healthcare access platform that enables the public to view clinic queue status, estimated waiting times, and medication availability.
- Developed responsive user interfaces for public users, clinic sta , and administrators using Next.js, Tailwind CSS, and Figma.
- Implemented role-based access control for Sta and Admin users while providing public access without patient registration.
- Implemented database structures for clinics, queue metrics, medication inventory, users, history, and audit logs.
- Implemented queue status indicators including Low, Moderate, Busy, Very Busy, and Closed.
- Implemented medication stock indicators including In Stock, Low Stock, and Out of Stock.

- Deployed the application using Vercel, Render, and Neon DB.

Clinic Management System

Technologies: Next.js, React, TypeScript, Tailwind CSS, Node.js, Express.js, SQL, PostgreSQL

- Developed a clinic management system for managing clinic information, sta , patients, and healthcare services.
- Designed responsive interfaces for clinic management and administrative functions.
- Designed database structures for storing and managing clinic-related information.
- Applied CRUD operations, SQL, authentication, and role-based access control.
- Applied full-stack development concepts using Next.js, React, Node.js, Express.js, and PostgreSQL.

HR Management System

Technologies: Next.js, React, TypeScript, Tailwind CSS, Node.js, Express.js, JWT, bcrypt, Neon DB, Git, GitHub, Vercel, Render

- Developed and designed a web-based Human Resources Management System for employee and HR process management.
- Used Next.js, React, TypeScript, Tailwind CSS, Node.js, and Express.js for full-stack development.
- Implemented and planned authentication, authorization, and role-based access control for HR Admin, Managers, and Employees.
- Applied JWT authentication and bcrypt password hashing for secure user authentication.
- Developed functionality for employee management, leave management, performance tracking, salary calculations, and employee status.
- Used Git and GitHub for source control and project management.

AI-Powered Student Attendance & Academic Progress System

Technologies: Python, Django, Java, SQL, HTML, CSS, Bootstrap, JavaScript, Chart.js, Facial Recognition

- Developed a student attendance and academic performance management system.
- Implemented attendance tracking, student management, and role-based access for students, teachers, and administrators.
- Applied SQL and database concepts to store, retrieve, and manage student attendance and academic data.
- Developed dashboards to display attendance and academic performance statistics using Chart.js.
- Implemented visual tracking of quizzes, assignments, class tests, and semester tests.
- Incorporated facial recognition concepts for identity verification and reducing proxy attendance.
- Developed responsive web interfaces using HTML, CSS, Bootstrap, and JavaScript.
- Collaborated with team members on system development, testing, and problem-solving.

EDUCATION

National Diploma in Computer Science

Tshwane University of Technology
February 2021 – 2026

Status: All academic requirements completed – awaiting graduation

Relevant Coursework

- Java Programming
- Database Systems
- Software Engineering
- Web Development
- Internet Programming
- Mobile Development
- PL/SQL
- Systems Analysis and Design

Academic Experience

- Developed database-driven applications using Java and SQL.
- Developed web applications using modern web technologies.
- Applied object-oriented programming and software engineering principles.
- Designed relational databases and developed SQL queries.
- Applied debugging, testing, and problem-solving techniques.
- Worked collaboratively on software development projects.

National Senior Certificate

Frank Maghinyane High School
January 2019 – November 2019

LANGUAGES

- XiTsonga – Fluent
- English – Good
- IsiZulu – Moderate
- Sepedi – Beginner

INTERESTS

- Software Development
- Web Development
- Coding Challenges
- Building Software Projects
- Learning New Technologies
- Technology and Innovation
- Problem-Solving

CAREER OBJECTIVE

Computer Science graduate seeking an entry-level Software Developer, Junior Software Developer, Full-Stack Developer, Web Developer, or IT Graduate position. Looking to apply skills in Java, JavaScript, TypeScript, Next.js, React, Node.js, SQL, PostgreSQL, and software development while contributing to real-world projects and continuing to grow professionally.
